Reports, edits, person-time
Reviewed target reference
Geometric quality
Floor, boundary, direction, height
Components and overall Q
Scorable layouts
Structural consensus
Identity, support, position
Connected layout
Output status
RQ1 Individuals
Across task conditions
RQ2 Group size
Add people within a pool
RQ3 Team composition
Vary profiles and members
RQ4 Cross-view
Repetition and transfer
Controlled offline comparisons
Within images: fix target; vary team size or members.
Across views: retain room relations and comparison support.
Evidence for annotation organisation and review
Clarify target rules; inspect disputed structures; use history and feedback to guide re-annotation.
