Exact saved consensus footprints explain both the prevailing pattern and its exceptions

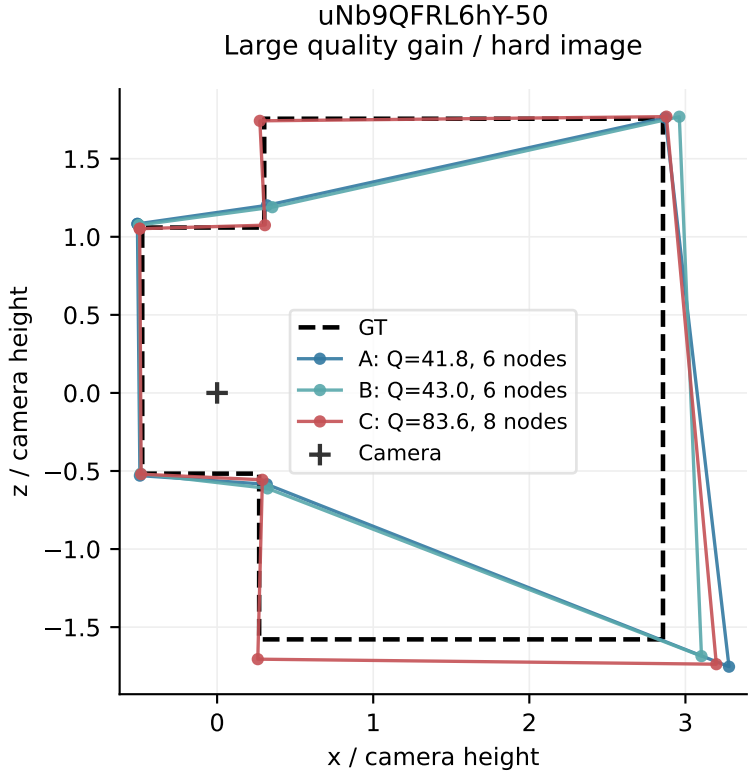

Image mean: GS=+40.10, shift=+43.30
Shown event: GS=+40.09, shift=+41.23

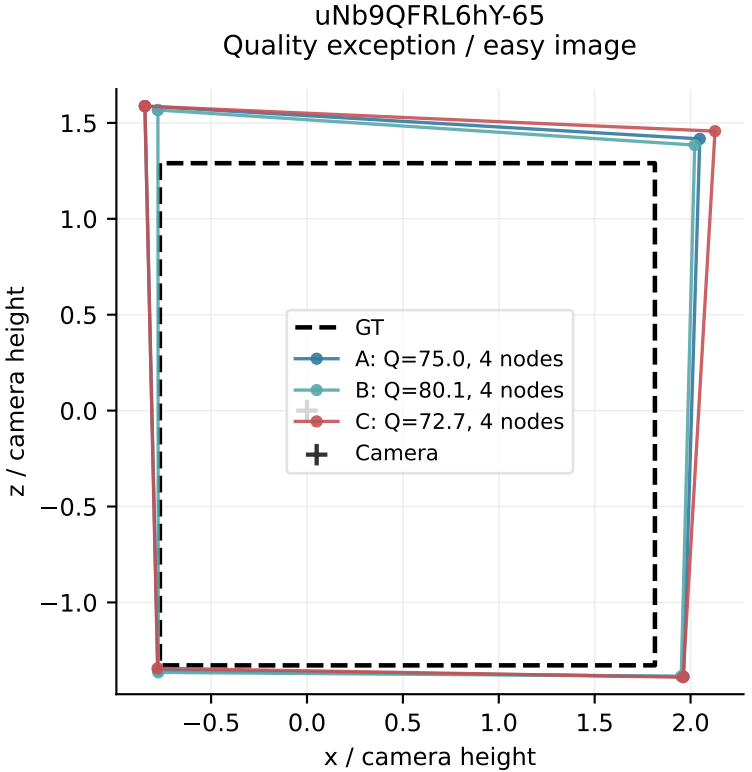

Image mean: GS=+0.16, shift=-4.96
Shown event: GS=-0.24, shift=-4.82

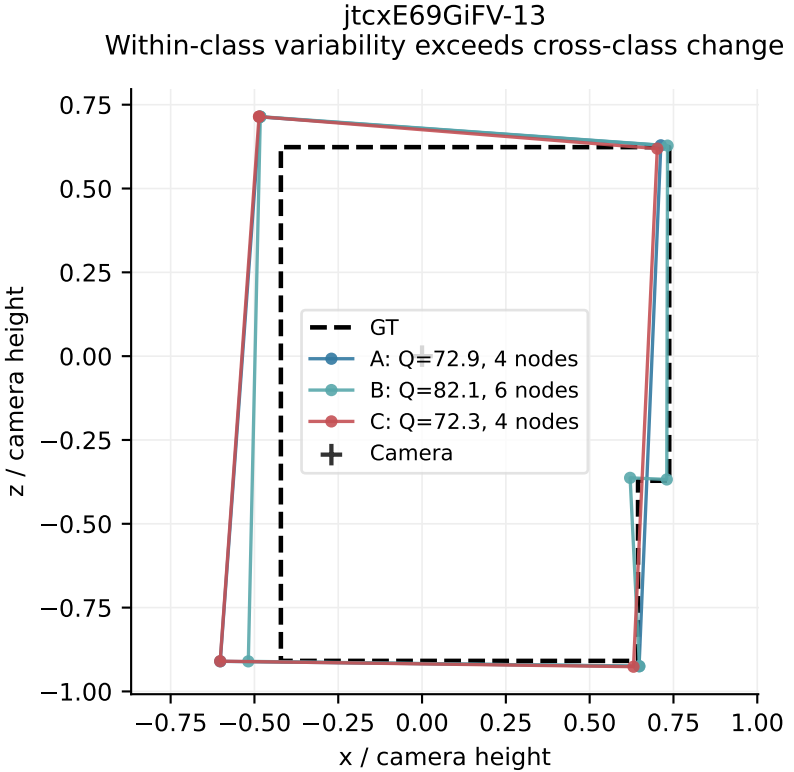

Image mean: GS=-3.72, shift=-5.05
Shown event: GS=-4.02, shift=-5.21

These are illustrative events from the fixed 8/4 study, selected near each image mean. Full polygons are retained; no coordinates or orders are edited.
The hard-image GT itself is not camera-star-shaped. It remains a valid frozen reference under the official research scoring contract.
